- 5.4. Conducts/contributes/designs/participates in and/or conducts research

Definitions:

The **Perioperative Nurse** is someone who has become an expert in one (or more) fields of Perioperative Nursing care.

Perioperative Nursing care is defined as nursing care delivered in the areas of preoperative, intraoperative and postoperative patient care.

Perioperative Nursing is a diverse and complex specialist field with many sub-specialities within it. Perioperative nursing predominantly covers the nursing care in the areas of surgical intervention, anaesthesiology and post anaesthetic care. In some instances, it also covers specialities such as ambulatory day care, endoscopy, sterilization, interventional radiology and pain management. These varied roles are a challenge to the development of a perioperative nurse's core competencies.

Qualified and experienced nursing staff working within the multidisciplinary team are expected to perform in a competent manner, displaying an awareness of current developments in research and knowledge relating to the operating department and perioperative nursing care.

Attaining the required competency level will enable the perioperative nurse to:

1. Provide quality care, in a safe manner, in the following roles:
 - Circulating nurse
 - Assistant to the anesthetist or anesthetic nurse (in some countries)
 - Scrub nurse
 - Post anaesthetic care unit nurse
 - Surgical Assistant (in some countries)
 - Hygiene management
 - Pain management nurse
 - Endoscopy nurse
 - Day surgery nurse
2. Operate as an equal member in a multi / interprofessional team
3. Participate in quality assurance programs
4. Organise and manage an Operating Room/Department
5. Partake proactively in risk management strategies
6. Maintain own professional competence through ongoing current education and awareness of current updates in perioperative nursing with an emphasis on new technologies
7. Participate in and/or conduct research and contribute towards the development of knowledge for perioperative nurse
8. Practice in accordance with legislation and professional guidance relevant to perioperative nurses/nursing
